

Scenario-defined FEM: target and actual H100 output

propeller bore widen compute
Released target

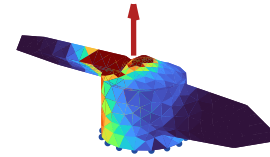

C = 5.242e-07 N mm; 1,460 tets

t5hard pan head screw U a
Released target

NO FEM RESPONSE
Boundary meshing failed
No contact or shape repair assumed

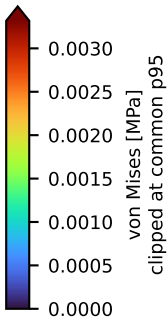

propeller bore widen compute
Actual final-adapter prediction

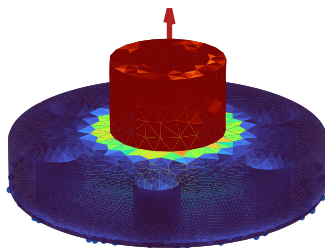

C = 5.221e-07 N mm; 1,773 tets

t5hard pan head screw U a
Actual final-adapter prediction

NO FEM RESPONSE
Boundary meshing failed
No contact or shape repair assumed

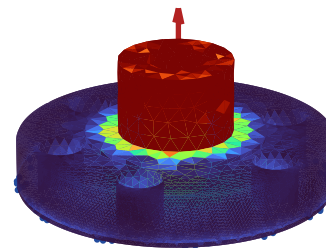

t5hard round flange V a
Released target

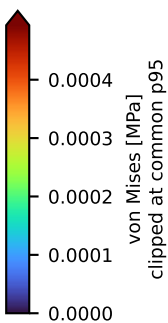

C = 1.212e-07 N mm; 58,938 tets

t5hard round flange V a
Actual final-adapter prediction

C = 1.212e-07 N mm; 59,273 tets

Assumed E = 210,000 MPa, nu = 0.3; 1 N test load. Blue: fixed nodes; red: load direction.
Undeformed meshes; compliance mesh check only. Stress fields are diagnostic, not a strength/safety verdict.
